Geography Policy

Draft Document:	Spring 2024
Draft Document to staff:	Spring 2024
Draft Document to Governors:	Spring 2024
Policy adopted by Governors:	Spring 2024
Review:	

Contents Page

1. School Vision, Values and Ethos & UN Convention on the Rights of a Child
2. Intent, Implementation & Impact
3. Legal framework
4. Roles and responsibilities
5. The National Curriculum
6. Cross Curricular Links
7. Teaching & Assessment
8. Equal opportunities
9. Monitoring and review

School Vision

At Bromley Hills, we promote a positive culture of social and emotional well-being and mental health resilience for pupils, staff, and our community. We want our children to achieve their full potential; through an inspiring and engaging curriculum, embedding our pedagogy that learning is a change to long term memory, so that they are equipped with the necessary lifelong knowledge and mental health awareness to enable them to become confident and independent valued members of our local community and British society.

School Values

Throughout our curriculum, we weave in a golden thread of core values, values which we believe are essential in preparing children for the wider world, and our young learners develop and build upon these as they go through school. Our core values are:

- Respect
- Honesty
- Cooperation
- Caring
- Teamwork

School Ethos

It's 'Time to Shine' - together we will succeed and achieve.

The UN Convention on the Rights of the Child

Article 29 - Every child has the right to an education to help them use and develop their talents and abilities.

Statement of Intent

Learning is a change to long term memory. Our aims are to ensure that our students experience a wide breadth of study based on the national curriculum and have, by the end of each key stage, long-term memory of curriculum knowledge.

We aim to inspire in pupils a curiosity and fascination about the world and its people. Teaching will equip children with knowledge about diverse places, people, resources and natural and human environments, together with a deep understanding of the earth's key physical and human processes. Through the continued development of oracy skills, we will expand pupil's geographical vocabulary which will deepen as they progress through school. Through our geography curriculum, we intend to inspire pupils to develop a love of geography and see how it has shaped the world they live in.

Statement of Implementation

Geography is taught through the 'Threshold Concepts' of investigating places, investigating patterns and communicating geographically. Each threshold concept is split into knowledge categories that teachers will explore with the children. Deliberate practise of these, whereby knowledge will be revisited again and again, will enable a gradual deepening of their understanding. We believe that learning is most effective with this spaced repetition and the interleaving between topics and frequently revisiting them, aids long term retention.

Teachers will utilise artefacts, purposeful experiences through visits and visitors, and a range of teaching styles in order to develop their understanding of geography so that it is in their long-term memory.

Statement of Impact

Because learning is a change to long term memory it is impossible to see impact in the short term. However, we do use probabilistic assessment based on deliberate practise. This means that we look at the practices taking place to determine whether they are appropriate, related to our end of key stage goals. We use comparative judgements against Milestone statements, in the tasks we set (POP

tasks) and in tracking students' work over time. We use lesson observations to see if the pedagogical style matches our depth expectations.

Impact is also measured through key questioning skills built into lessons, child-led assessment against the objective (WAGBA), and summative assessments aimed at targeting next steps in learning.

Legal Framework

This policy has due regard to all relevant legislation and statutory guidance including, but not limited to, the following:

- DfE (2013) 'National curriculum in England: geography programmes of study'
- DfE (2023) 'Statutory framework for the early years foundation stage'
- This policy operates in conjunction with the following school policies:
 - Primary Teaching and Learning Policy
 - Primary Assessment Policy
 - Primary Curriculum Policy
 - Educational Visits and School Trips Policy
 - Health and Safety Policy

Roles and responsibilities

The governing board will be responsible for:

- Ensuring a broad and balanced geography curriculum is implemented in the school.
- Ensuring the school's geography curriculum is accessible to all pupils.

The headteacher will be responsible for:

- The overall implementation of this policy.
- Ensuring the school's geography curriculum is implemented consistently.
- Ensuring appropriate resources are allocated to the geography curriculum.
- Ensuring all pupils are appropriately supported.
- Appointing a member of staff to lead on the school's approach to teaching geography.

The geography lead will be responsible for:

- Maximising pupils' potential attainment and achievement and taking lead accountability for pupil progress.
- Leading, managing and developing the school's geographical provision.
- Preparing policy documents, curriculum plans and schemes of work for geography.
- Reviewing changes to the national curriculum and advising on their implementation.
- Monitoring the learning and teaching of geography, providing support for staff where necessary.
- Organising the deployment of resources and carrying out an annual audit of all geography resources.
- Leading staff meetings and providing staff members with the appropriate training.
- Advising on the contribution of geography to other curriculum areas.

Geography teachers will be responsible for:

- Acting in accordance with this policy.
- Liaising with the geography lead about key topics, resources and supporting individual pupils.
- Ensuring that all relevant statutory content is covered within the school year.
- Monitoring the progress of pupils in their class and reporting this on an annual basis.
- Reporting any concerns regarding the teaching of the subject to the geography lead or a member of the SLT.
- Undertaking any training that is necessary to teach the subject effectively.

National Curriculum

The national curriculum will be followed for all geography teaching.

During Reception, in accordance with the 'Statutory framework for the early years foundation stage', focus will be put on the seven early learning goals (ELGs), with the geographical aspect of pupils' work relating to the objectives set out within the framework. The ELGs cover:

1. Communication and language: listening, attention and understanding; and speaking.
2. Personal, social and emotional development: self-regulation, managing self, and building relationships.
3. Physical development: gross motor skills and fine motor skills.
4. Literacy: comprehension, word reading, and writing.
5. Mathematics: number and numerical patterns.
6. Understanding the world: past and present; people, culture and communities; and the natural world.
7. Expressive arts and design: creating with materials; and being imaginative and expressive.

During Years 1 and 2, pupils will be taught to:

Locational knowledge

- Name and locate the world's seven continents and five oceans.
- Name, locate and identify characteristics of the four countries and capital cities which make up the UK and its surrounding seas.

Place knowledge

- Understand the geographical similarities and differences through studying the human and physical geography of a small area of the UK and of a small area in a contrasting non-European country.

Human and physical geography

- Identify seasonal and daily weather patterns in the UK.
- Locate hot and cold areas of the world in relation to the Equator and the North and South Poles.
- Use basic geographical vocabulary to refer to:
 - Key physical features: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley, vegetation, season and weather.
 - Key human features: city, town, village, factory, farm, house, office, port, harbour and shop.

Geographical skills and fieldwork

- Use world maps, atlases and globes to identify the UK and its countries, as well as any other countries, continents and oceans studied.
- Use simple compass directions (i.e. North, South, East and West), and locational and directional language, to describe the location of features and routes on a map.

- Use aerial photos and plan perspectives to recognise landmarks and basic human and physical features; devise a simple map; and construct basic symbols in a key.
- Use simple fieldwork and observational skills to study the geography of the school its grounds and identify the key human and physical features of the surrounding environment.

During Years 3 to 6, pupils will be taught to:

Locational knowledge

- Locate countries around the world, using maps to focus on Europe and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities.
- Name and locate counties and cities of the UK, geographical regions and their identifying human and physical characteristics, key topographical features (e.g. hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time.
- Identify the position and significance of latitude, longitude, the Equator, the Northern and Southern Hemisphere, the Tropics of Cancer and Capricorn, the Arctic and Antarctic Circle, and the Greenwich Meridian and other time zones.

Place knowledge

- Understand geographical similarities and differences through the study of human and physical geography of a region of the UK, a region in another European country, and a region in North or South America.

Human and physical geography

- Describe and understand key aspects of:
- Physical geography: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes, and the water cycle.

- Human geography: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water.

Geographical skills and fieldwork

- Use maps, atlases, globes, and digital or computer mapping to locate countries and describe features studied.
- Use the eight points of a compass, four- and six-figure grid references, symbols, and keys (including Ordnance Survey maps) to build knowledge of the UK and wider world.
- Use fieldwork to observe, measure, record and present the human and physical features in the local area using methods including sketch maps, plans and graphs, and digital technology.

Cross Curricular Links

Where possible, the geography curriculum will provide opportunities to establish links with other curriculum areas. This includes:

English

- Pupils' writing skills are developed through recording their planning and findings.

Maths

- Pupils use their knowledge and understanding of measurement and data handling, including through recording their findings on charts, tables and graphs.

Science

- Pupils use their knowledge of the natural world to identify and analyse features of physical geography.

History

- Pupils will learn some of the ways humans have influenced and affected landscapes and why they inhabit that area.

Planning, Teaching & Assessment

All relevant staff will be briefed on the school's lesson planning procedures as part of staff training.

Throughout the school, geography will be taught as a discrete lesson and as part of cross-curricular teaching when appropriate. The statutory national curriculum content from the DfE's 'Geography programmes of study: key stages 1 and 2', as outlined above, is the starting point for their planning.

Lesson plans will balance visual, auditory and kinaesthetic elements used in teaching, ensuring that all pupils with different learning styles can access the learning experience. All lessons will have clear learning objectives, which are shared and reviewed with pupils.

Long-term planning will be used to outline the units to be taught within each year group. Medium-term planning will be used to outline the vocabulary and skills that will be taught in each unit of work, as well as highlighting the opportunities for assessment, identifying learning objectives, main learning activities and differentiation. Short-term planning will be used to reflect the objective of the lesson, the success criteria and the aim of the next lesson, building on medium-term planning and taking into account pupils' needs. **Chris Quigley** planning and resources will be used to help aid teachers in their planning.

Teaching

Pupils will be taught to describe associated processes and key characteristics in common language, as well as understand and use technical terminology and specialist vocabulary. Lessons will allow for a wide range of geographical enquiry, including the following:

- Questioning, predicting and interpreting
- Pattern seeking
- Practical experiences
- Collaborative work
- Roleplay and discussions
- Problem-solving activities
- Classifying and grouping
- Researching using secondary sources

Opportunities for outdoor learning will be provided where possible. Each year group will have the opportunity to undertake geography-based external educational visits at least once per year.

Assessment

Pupils will be assessed and their progression recorded in line with the school's Primary Assessment Policy. Assessment in geography will be based upon geographical knowledge and understanding.

Pupils will be assessed continually throughout the year and will undertake a summative assessment at the end of each topic – known as a POP task. Teachers will be encouraged to cover misconceptions after the POP task. Formative assessment will be carried out informally throughout the year. This will enable teachers to identify pupils' understanding of subjects and inform their immediate lesson planning. The results of end-of-year assessments that has been correlated by formative and summative assessment will be passed to relevant members of staff.

Assessment will take various forms, including the following:

- Talking to pupils and asking questions
- Discussing pupils' work with them
- Marking work against learning objectives
- Specific assignments for individual pupils

- Observing practical tasks and activities
- Pupils' self-evaluation of their work
- Classroom tests and formal exams (POP TASK)

Parents will be provided with a written report about their child's progress during the Summer term every year. Reports will include information on the pupil's attitude towards geography, progress in understanding geographical methods, ability to investigate, and the knowledge levels they have achieved. Verbal reports will be provided at parent-teacher meetings during the Autumn and Spring terms.

Equal Opportunities

All pupils will be given equal access to the entire geography curriculum, including fieldwork and educational visits.

Where required, pupils with SEND will be provided with additional support in order to fully engage with the geography curriculum.

Where it is inappropriate for a pupil to participate in a specific lesson because of reasons related to any protected characteristics, the lesson will be adapted to meet the pupil's needs and alternative arrangements involving extra support will be provided where necessary.

The school aims to provide more academically able pupils with the opportunity to extend their geographical studies through extension activities such as problem solving, investigative work and geographical research.

Monitoring and Review

This policy is reviewed annually by the headteacher and the subject leader. Any changes to this policy will be communicated to all relevant staff members.
